

JAINAM POKAL

Front-End Developer

About Me

Skilled in front-end web development with a knack for seamless integration and intuitive problem-solving. Passionate about bringing new projects to life and translating business needs into effective technical solutions. Eager to launch a career as an entry-level front-end developer with a technology-driven firm.

PROJECTS

1.COURSERA CLONE |

This project is a clone of (Coursera), a popular online learning platform. The clone replicates core features of Coursera, such as course browsing, enrollment, user authentication, and video streaming. This project aims to provide a comprehensive learning management system (LMS) for both students and instructors.
